1998 Publications, by Category and Page Number

The index appears in three parts. The first, which begins below, lists publications by major category, and within categories, by page number. In order, the categories are Original Articles, Concise Communications, Special CIPI Issue, Editorials, SHEA Position Papers, Special Reports, Readers' Forum, the Sections, Letters to the Editor, Abstracts, and Corrections. Items published in Medical News and SHEA News are not indexed.

This comprehensive list is followed by the Author Index (page 935) and the Subject Index (page 940). Each entry in those latter indices points to a major category and page number in the comprehensive list below, where the complete citation may be found.—Ed.
